Application/Control Number: 10/022,092

Art Unit: 1734

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-24, drawn to process, classified in class 264, subclass 481.

II. Claims 25-38, drawn to an apparatus, classified in class 425, subclass 392.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to shape a solid object such or rod instead of a hollow pipe.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Allison Collard on 1/14/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/022,092
